# Atos

**Atos Greece** is an international R&D hub, employing approximately 300 engineer professionals. We operate in an agile setup, as a global organization to ensure fast turnaround for top-quality products, solutions, and services. Aspiring to be a global technology champion, we set a reference in patents and innovation. We believe that bringing people, technology and business together is the way forward.

People are our most precious asset. **"We Are Atos"** initiative focuses on our employees' experience through five key areas:

**Diversity & Inclusion, Social Value, Wellbeing, Life@Work, Customer Experience**

During the unexpected situation of COVID-19, Atos has responded quickly and effectively to ensure safety and uninterrupted work. What we did?

- **Telework** was already an option for us. Having the ability and mentality to WfH embedded in our culture, allowed us to be ready since day one. Even before the first lockdown, most of our employees started WfH.
- Being proactive running stress tests, before lockdown, our IT

department worked hard, ensuring remote access in every platform, system, and data base. A 180.000€ investment was made to upgrade the equipment of our people with 145 monitors and 164 laptops, all delivered to everyone's homes.

- During homeschooling, we donated laptops to the parents to cover children's needs for virtual classes.
- **Tips and hints:** Setting our work-life balance and wellbeing as a top priority we are sending frequent communication with updates and guideline.
- **CSR:** Staying true to our values never stopped being a priority. We decided to turn all our CSR initiatives and events virtual
  - Fitness and exercise sessions
  - Mindfulness and holistic health sessions
  - Donation bazaars
  - Innovation week celebration building our technological journey and honor our talents' ideas
  - **#YourHR Time.** Meetings with HR focusing on topics such as WfH in lockdown, effective communication, time-management etc.
