Dialog Semiconductor is a world leading provider of low-power, advanced mixed signal integrated circuits (ICs). Our products support a wide range of applications, including some of the world's most recognisable products. Our semiconductor-based solutions are offered as standard, configurable and custom products and empower customers to develop the next generation of devices that are enhancing consumer product functionality, accelerating the pace of innovation and powering the smart connected future.

Why join us?

We recruit globally for the most talented people, identify centers of engineering talent and build our business around them. We operate from over 30 locations in 15 countries and our global workforce continues

to increase with diverse talent. We have office locations in Athens and Patras that we are looking to grow, and have job opportunities within our Software Engineering, Hardware Engineering and IT teams. We are also building a new Software team to support our Automotive Business Group in Athens. We have an open approach to flexible working and welcome a conversation to discuss individual needs to work in our team. Dialog has consistently invested a healthy percentage of its revenue into R&D, to ensure our technology offering remains competitive, attractive and forward focused.

Our growing customer base appreciates that we provide flexible and dynamic support, world-class innovation, and the assurance of working with an established business partner.

Driven.

Collaborative.

Daring.

Open.
