ΒΡΑΒΕΙΑ

With a unique combination of creative, innovative, and technical services, PRODYNA empowers customers around the globe in their customer experience, digitalization, and cloud computing strategies. We design, implement, and operate custom software applications for mid- to large-sized enterprises and are committed to offering our customers innovative and future-proof solutions.

Speed, agility, and scalability are the new paradigms of software development and are at the center of the PRODYNA approach. PRODYNA is a member of the Cloud Native Computing Foundation (CNCF), is a Certified Kubernetes Service Provid-

er (CKSP), and a Kubernetes Training Partner (KTP). For customer references and project examples, please visit www.prodyna.com.

Spread over eight countries, fifteen office locations and even more project locations, 360 employees work in numerous and diverse customer projects. Despite different cultures, languages or career focuses, we have a common vision: Bringing our customer's projects to success and developing user-friendly software. We place great emphasis on close relationships with our customers, employees and partners in the open source environment. We associate the name PRODYNA with professionalism and dynamic.

We turn brilliant ideas
into brilliant software
