SUNLIGHT

POWER IS KNOWLEDGE

SUNLIGHT specializes in the development of the next generation energy storage products for industrial and advanced technology applications, always conscious of its environmental impact and with a genuine passion for value creation & constant improvement.

Headquartered in Greece, SUNLIGHT has developed a robust worldwide sales and partners network. The company's consistent global outlook has made it a major international player in the energy storage sector with 92% of its production exported to more than 100 countries. At the core of the company's growth lie its state-of-the-art manufacturing plants in Northern Greece, the main production facility of manufacturing batteries and the recycling facility of used batteries. Also, new battery assembly units are operating in Italy and the USA for better servicing our partners.

We envision to create an organization in which power is based on knowledge.

We believe that power is knowl-

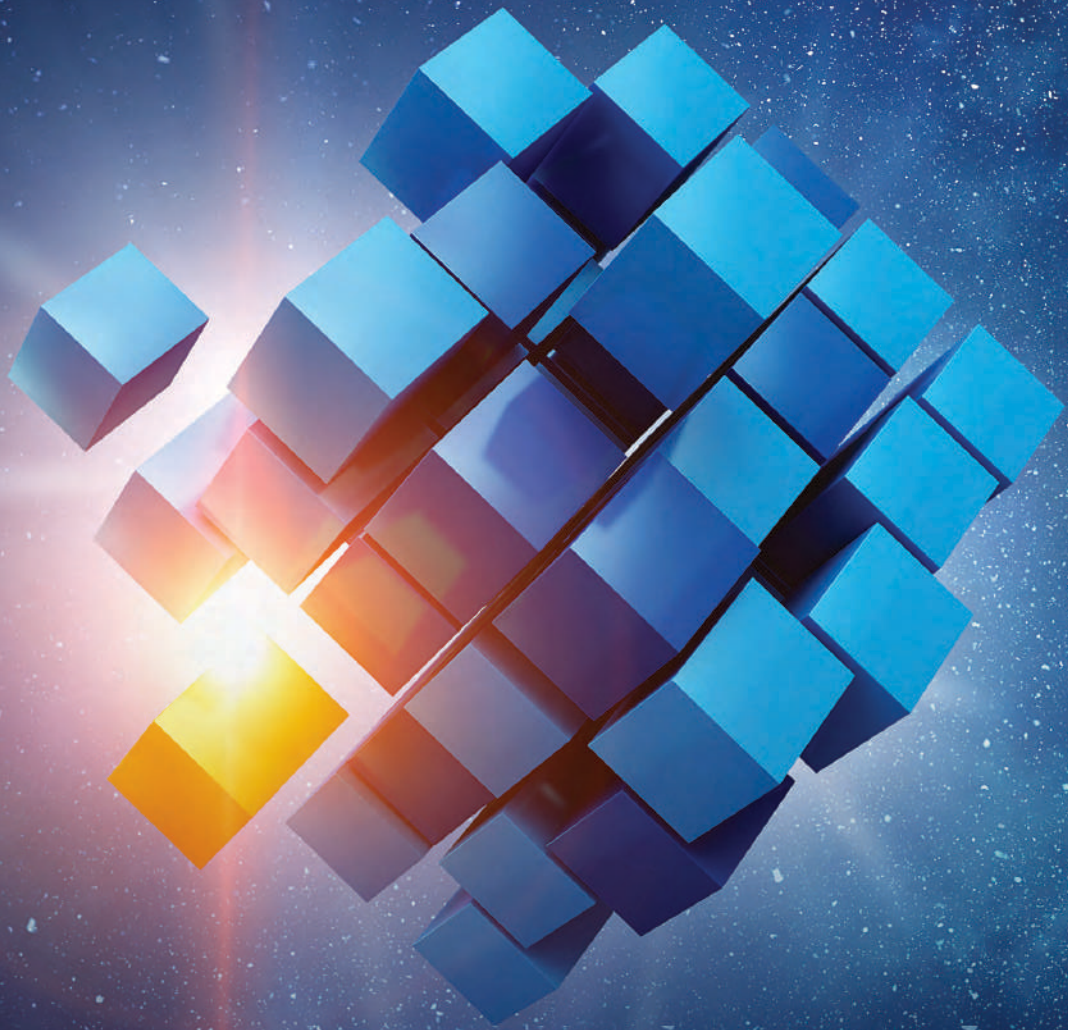

edge, thus our purpose is to tirelessly pursue knowledge through data and insights. Turn those into innovation which serve our customers and improve the lives of the people who are belonging to the ecosystem.

Our mission is for the knowledge we create to be based on data and to transform this knowledge into innovative products and applications.

Talent is our greatest asset!

With more than 1000 employees across regions, our specialized knowledge, innovative expertise, and foremost our people's passion for what we do are key factors of our success. We offer numerous growths and career advancement opportunities within a highly competitive and fast-moving sector. We focus on empowering our employees to be their best while add value to our business. If you embrace innovation and agility and want to work with new tech to improve peoples' life, SUNLIGHT is the place to be!
