Uni Systems provides consulting, design, implementation and support in the field of ICT integrated solutions and services through operations spanning across 26 countries in Europe. Our journey in informatics dates back in 1964, and today, as member of the dynamic Quest Group, we are one of the largest companies of the sector in Greece with expanding activities abroad, challenging a position among the most reliable ICT companies in the European Union and the SEE European marketplace.

We are committed to providing innovative and agile solutions ranging from the infrastructure, to specialized vertical business applications and value added services aimed at strengthening our clients' positioning within a competitive and ever-changing international environment.

We marked a growth of 15% in 2020 with a turnover that reached €134m. Through our offices in Greece, Belgium, Luxembourg, Italy and Romania, and with the valuable support of over 900 highly skilled UniQue IT people, we are

able to serve more than 700 customers across geographies.

At Uni Systems we believe in continuous development; that we can reach excellence and produce sustainable value through our people. The Uni Systems Talent Management program, investing in the UniQue talents of our people was designed, at a Group level, to identify, maintain and develop the top talent within the company.

We are proud to consider learnability one of our main values, therefore our UniQue people participate regularly in engaging learning activities. Technical trainings, leadership programs, workshops and e-learning courses are only a few of them.

During these challenging times, special emphasis and focus has been placed upon employee mental health and support. Our strong partnership with Hellas EAP, powered by "Quest by you" on a Group level, has allowed us to stand by all employees regardless of working mode (remote or in the office) with a 24/7 support line and regular informative material on troubling issues.
