Dialog Semiconductor is a world leading provider of low-power, advanced mixed signal integrated circuits (ICs). Our products support a wide range of applications, including some of the world's most recognizable products.

Renesas is built on the foundation that combines the rich culture of technology and innovation of Hitachi, Mitsubishi and NEC. In 2021, Renesas completed its acquisition of Dialog, expanding its footprint in Europe. With Intersil, IDT and Dialog now in the fold, Renesas enters a new era as a truly cosmopolitan company with a progressive mindset and modern vision to lead the industry.

Renesas Electronics Corporation is a global semiconductor company delivering trusted embedded design innovation with complete semiconductor solutions that enable billions of connected, intelligent devices to enhance the way people work and live.

A global leader in microcontrollers, analog, power, and SoC products, Renesas provides comprehensive solutions for a broad range of automotive, industrial, infrastructure,

and IoT applications that help shape a limitless future.

Renesas will continue to grow as a global leader in embedded solutions for high-growth markets: automotive, industrial/infrastructure and IoT.

Our purpose:

"To Make Our Lives Easier by complementing human capabilities".

Our mission is to develop a safer, healthier, greener, and smarter world by providing intelligence to our four focus growth segments: Automotive, Industrial, Infrastructure, and IoT that are all vital to our daily lives, meaning our products and solutions are embedded everywhere.

To realize our ambitious goals at the forefront of tomorrow's key technologies, we need the most qualified employees from all over the world. Within an increasingly specialized environment, you have the opportunity to make contributions to Renesas' worldwide business and simultaneously intensify international relationships with colleagues and customers.

A glowing wireframe brain and a blue data visualization on a circuit board. The background is a dark, blue-toned image of a circuit board with several integrated circuits (chips) and glowing green and blue lights. In the center, a glowing white wireframe brain is positioned above a blue, rectangular data visualization that looks like a bar chart or a signal waveform. The overall aesthetic is futuristic and technological.
