ΒΡΑΒΕΙΑ

- ✓ Διάκριση ICAP True Leaders Award για τις επιδόσεις της εταιρείας κατά το 2020

uni.systems

At Uni Systems, we see IT differently.

With our people being the driving force behind everything we have achieved, we successfully provide consulting, design, implementation and support in the field of ICT integrated solutions and services through operations spanning across 26 countries in Europe. We were the first to embark on the informatics journey that started in 1964, and today, as a member of the dynamic Quest Group, we hold a prominent position and claim a seat among the most reliable ICT companies in Europe.

We are systems integrators committed to providing innovative and agile solutions and value added services aimed at strengthening our clients' positioning within a competitive and ever-changing international environment. Through our offices in Greece, Belgium, Luxembourg, Italy, Romania, and Spain, and with the valuable support of over 1100 UniQue IT people, we serve more than 700 customers across geographies and markets.

At Uni Systems, we believe in the continuous development of our UniQue people with learnability lying at the core of our principles: our people participate on a regular basis in engaging learning activities, with technical trainings, leadership programs, workshops and e-learning courses through Udemy, Pluralsight, and LinkedIn Learning platforms being only few of them. Moreover, in collaboration with ALBA Graduate Business School we are offering a Mini MBA program designed to cover the needs of Quest Group's employees. At the same time, UniQue talents are being recognized through a specially designed Talent Management program that helps us identify, maintain and develop them. Being a part of our team means numerous benefits such as private medical insurance, hybrid working model, and mental health programs to support our people during these challenging times.

Based on the immense potential of our UniQue people we can reach excellence and produce sustainable value. Are you ready to BeUniQue?
